

## DIVINE INFLUENCE / SIGNALING WITH THE NUMBER 137

### Abstract

It is funny and paradoxical, much of my life chuckling of those who thought see signs in pyramid measures or such stories and now I find this:

The numbers 137 appear in some of the most important greek temples. Height of Parthenon, length of Artemis Temple, and width of Hephaestus Temple. Measured In meters.

The likelihood of a measure begins with digits 137 according to [Benford's Law](#) is:

$$\text{Log} (1 + 1/137) = 0.00315 = 0.315\% \quad [1]$$

The frequency of occurrence in these measurements is much higher than expected.

Length, height, width. This “signs” suggests that Divinity is composed of different dimensions.

Gosh, now that I see, it is also in the height of Great Pyramid, the length of Horus Temple.

In the Bible are the length and height of Noah's Ark, the length of the Tabernacle of Moses, the height of Solomon's Temple and some related objects.

Considering myself a convinced atheist for much of my life, seeing this is an indescribable surprise.

Divine influence acting for millenia and now it is revealed thanks to easy access to information by internet.

Les dimensions colossales (137,74 m de longueur et 71,74 m de largeur) du Temple d'Artémis à Ephèse et la richesse de sa décoration expliquent qu'il fasse partie des Sept merveilles du monde.

Hephaestus Temple: Width 13.7 meters. [4]

## Description [edit]

Many architects have been suggested, but without firm evidence one refers simply to 'The Hephaisteion Master'. The temple is built of marble from the nearby Mt. Penteli, excepting the bottom step of the *krepis* or platform. The architectural sculpture is in both Pentelic and Parian marble. The dimensions of the temple are 13.708 m north to south and 31.776 m east to west, with six columns on the short east and west sides and thirteen columns along the longer north and south sides (with the four corner columns being counted twice).

Pyramids: Height 137 meters. (contemporary) [5]

### Khafra's Pyramid – Giza

### description

- This pyramid was built around the year 2500 b.c. as the tomb of the king chephren who ruled egypt for 25 years. This pyramid reaches 137 meters in height , its base measures 210 meters per side . This is the only pyramid which is still covered with lime at the top.

Horus Temple: Length 137 meters. [6]

## El Templo de Horus (Edfú)

El templo de Edfú, dedicado al dios halcón Horus, fue comenzado el año 237 a. C. por Ptolomeo III Evérgetes I. En el año 212 a.C. se habían concluido las obras de la parte interior por Ptolomeo IV Filopátor, y se decoró en el 142 a.C. por Ptolomeo VIII Evérgetes II quien también terminó la primera sala hipóstila. Las obras en su totalidad no concluyeron hasta el 57 a.C con la colocación de las puertas.

Es el templo mejor conservado de Egipto y el más importante después del de Karnak. Mide 137 metros de longitud por 79 de ancho y 36 de altura, y representa la típica construcción de los templos con el pylon, el patio, 2 salas hipóstilas, una cámara de ofrendas, la sala central y el santuario. Es característica la iluminación del templo, con habitaciones cada vez más pequeñas que impedían el paso de la luz gradualmente hasta llegar al oscuro santuario, que recibe la iluminación sólo desde el eje. Entre las columnas y en el techo existen pequeñas aberturas que permitían el paso de la luz a determinadas habitaciones. Está orientado al sur, de forma inusual, posiblemente debido a la propia naturaleza de la zona.

Noah's Ark: Length 137 meters, Height 13.7 meters.

Genesis 6:15 "...The length of the ark shall be three hundred cubits, the breadth of it fifty cubits, and the height of it thirty cubits." [7] cubits - meters conversion [8]

## Biblical specs of the Ark

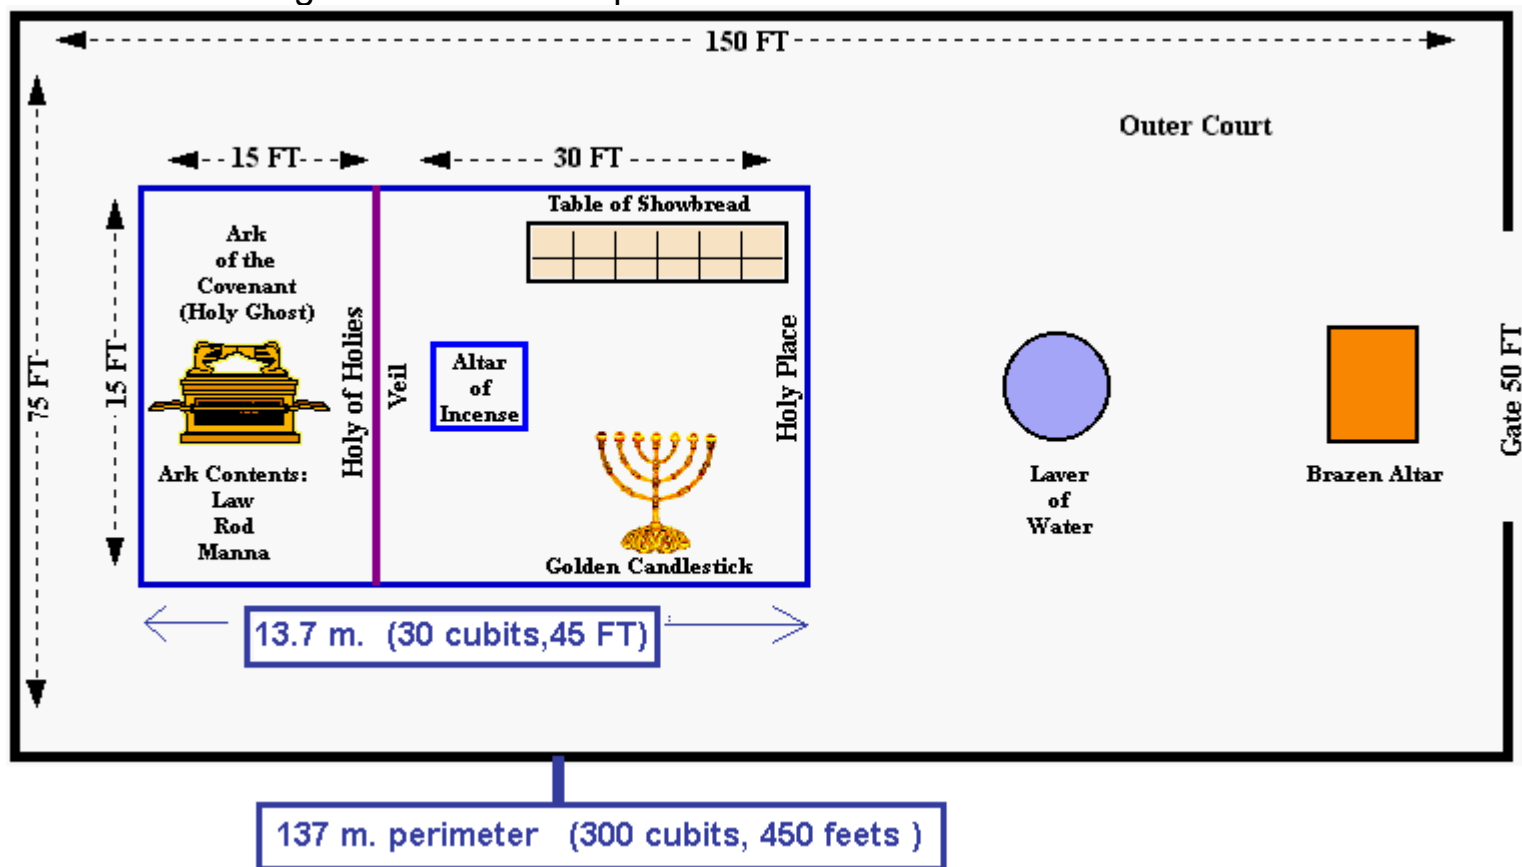

Assuming an 18-inch cubit [45.72 centimeters], Noah's Ark would have had a cubic volume equal to **569 modern railroad stock cars**.  
3 floors. 40,000 animals in 167 RR cars

Solomon's Temple. Height 13.7 m [10] [9]

Tabernacle of Moses. Length 13.7 m. Court perimeter 137 m.

**TIME DIMENSION**

Also it is seen in temporal dimension. Continuing with the classics Gods: Uranus. Discovered at March 13, 1781 ( factoring 1781 = 13 x 137 )

Pluto: The famous image of the heart from the New Horizons probe the day 13-7-2015

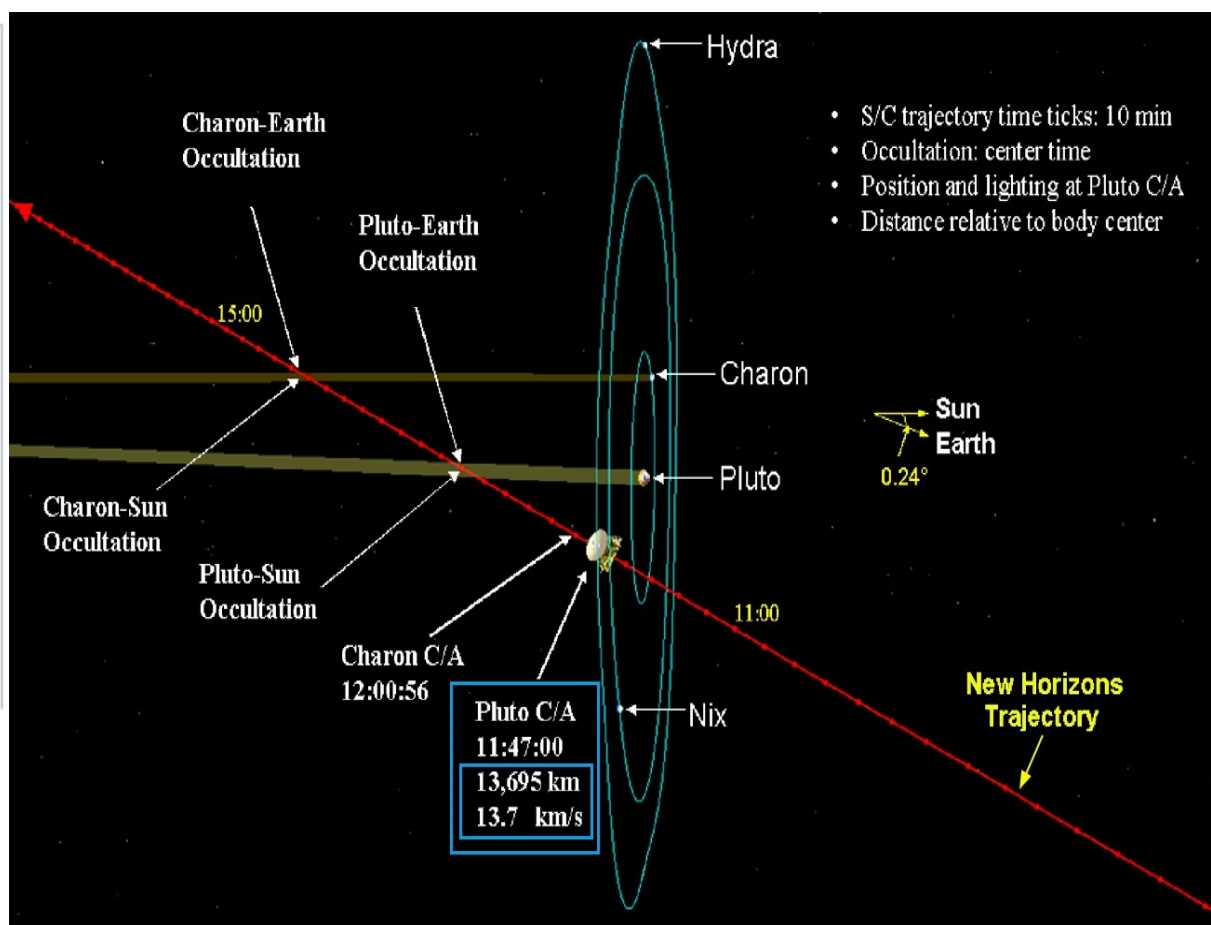

[19]

A few hours later (14/7 11:47GMT, the night of 13/7 in Los Angeles) reaches the maximum approach of 13700 km, at a speed of 13.7 km/s

**Plutón** ♇

Interestingly here it appears in 3 ways:

The temporal dimension, the spatial length, and the speed = space / time. Perhaps symbolizing something or simply to give weight to this divine "coincidence" with 3 measurements simultaneously.

## LOS ANGELES CITY

The city of Los Angeles was founded in 1781, factored 137x13. In its seal are 13 and 7.  
And the Hollywood Sign erected in 13-7-1923, and has 13.7 meters high. [\[20\]](#)

## DISCUSSION

137 is a "famous" number that appears on many fundamental issues. [\[12\]](#)

People with scientific background can recognize this number in some fundamental places:

The Fine Structure Constant. [\[13\]](#)

The Age of the Universe. [\[14\]](#)

M-Theory Dimensions (1 time, 3 space, 7 hidden)

"According to Witten, M should stand for "magic", "mystery", or "membrane" according to taste, and the true meaning of the title should be decided when a more fundamental formulation of the theory is known " [\[15\]](#)

A biologist maybe can see the number of atoms of Chlorophyll (  $C_{55}H_{72}O_5N_4Mg$  )

"Chlorophyll is an extremely important biomolecule, critical in photosynthesis, which allows plants to absorb energy from light." [\[16\]](#)

A Kabbalist the number corresponding to the Kabbalah. [\[17\]](#) [\[12\]](#)
