Abstract

In this paper, we analyze the behavior of prime numbers.

1 Introduction and results

In 1859, Riemann [Rie59] computed the distribution of primes. Our mission is to axiomatize the structure of primes. We have the following postulate.

Postulate 1. Let p be a prime number. Then:

1. $p \neq 0, 1$.
2. $1 \mid p$.
3. $p^0 = 1$.
4. $p \nmid p + 1$.
