May 31, 2017

Abstract

In this paper, we analyze the behavior of prime numbers.

1   Introduction and results

In 1859, Riemann [Rie59] computed the distribution of primes. Our motivation is to axiomatize the structure of primes. We have the following postulate.

Postulate 1. Let p be a prime number. Then:

1. $p \neq 0, 1$.

2. $1 \mid p$.

3. $p^0 = 1$.

4. $p + 1 \in \mathbf{N}$.
