**LET US NOT FORGET THAT THE BIG BANG THEORY "LOST" IN THE SCIENTIFIC DEBATES OF THE DECADE OF THE 1950's.**

**LET US NOT FORGET THAT THE SCIENTIFIC TEXTBOOKS DID NOT TEACH THE BIG BANG THEORY UNTIL AFTER THE DEATHS OF ALBERT EINSTEIN (1955) & EDWIN HUBBLE (1950).**

**Finally, the Big Bang Theory, which began with Dutch Astrophysicist Willem de Sitter "tweaking" the Cosmological Constant LAMBDA in 1917 to provide the energy is not the Big Bang Theory that lost in the 1950's.**

**The Big Bang Theory that lost in the debates of the 1950's rose like the mythical Phoenix Bird from the ashes of its own defeat to become the Concordant Cosmology - the Current Standard Model(CSM) - in the 1970's without any remedy for its tragically flawed condition. The Big Bang Theory of 1970 is not the Big Bang Theory in the best-selling book by Nobel Laureate Steven Weinberg, THE FIRST THREE MINUTES (1977), but is in the best-selling book by Stephen Hawking , A BRIEF HISTORY IN TIME (1988).**

**It is of no matter because the Inflation Model by Alan Guth (1979/80) became the Current Standard Model, for a short time, until Saul Perlmutter replaced it with the Accelerating Model in 2003.**

**In 2004, enough was enough & thirty three Scientists, Ph.Ds. & degreed Engineers formed the non-profit professional association, Alternative Cosmology Group & issued the Cosmology Statement. Its sole purpose, to present a united front to oppose Big Bang Physics.**

**Let us return to the days after the famous Total Solar Eclipse of 1919. A Russian Physicist, Aleksandr Friedmann "flipped the script" of the LAMBDA-less Field Equations in the Minkowski Space Time Continuum & delivered four mathematical "proofs".**

- 1. The Static Continuum**
- 2. The Expanding Continuum**
- 3. The Collapsing Continuum**
- 4. The Oscillating Continuum**

Friedmann was the Doctorial Adviser to several students, most notably, George Gamow. Gamow & his wife, who was also a Physicist, emigrated from Stalinist Russia & became a Doctorial Adviser in a university in the United States of America. His Ph.D. students presented dissertations to support Friedmann's "Expanding Continuum" which was plagiarized after Friedman's untimely death by the Roman Catholic Priest, Georges Lemaitre.

Meanwhile, George Gamow wrote books for general consumption by John Q. Public. The first book was Mr. Tompkins In Wonderland, in 1939, which was followed by three more Mr. Tompkins books. In 1947, Gamow wrote One, Two, Three...Infinity: Facts and Speculations of Science. In 1964, Gamow wrote A Star Called The Sun & A Planet Called Earth followed in 1965.

In 1964, two Radio Astronomers, Arno Penzias & Robert Wilson, "rediscovered" the ambient electrical activity which Engineer Karl Janski monitored & found the periodical aberration that led to Radio Astronomy in the year 1931.

An American Physicist, Robert H. Dicke, "predicted" the Cosmic Microwave Background Radiation, as a consequence of the hypothetical Big Bang's "hot beginning", before Penzias & Wilson booked hours on the new Horn Antennae of Satellite Communication at Bell Labs, in New Jersey. (Ironically, Janski was an Engineer who was employed by Bell Telephone, formerly Bell Telegraph!)

Oh, by the way, the CMB Radiation? There was no HOT BEGINNING, no "EXPLOSION", according to the latest theory.

As Shakespeare wrote, "Told by an idiot, full of sound and fury, signifying nothing." Macbeth, Act V, Scene V.

Fret not thyself! When the expanding universe is beset with unsurmountable problems, do as Einstein did in 1932 when he removed the LAMBDA which he "invented", in 1916. He called it, "My Biggest Mistake."

Einstein abandoned his theory & replaced it with the theory of then-deceased Friedmann.

Big Bang Theorists can call a "Mulligan" & start anew with Friedmann's OSCILLATING SPACETIME CONTINUUM!!!

Thank you for reading this installment of CLUELESS IN PARADISE. Happy De-Programming!
