The Assumption Of S. Virgin Mary -Written in Cairo – Egypt –2nd December 2018

Abstract

Earth Pluto Relationship disproves the solar group current theory
And proves that the solar group is one geometrical structure

1- Introduction

In this paper we discuss a discovered relationship between Earth and Pluto which disproves simply the gravity concept and supports my claim that

- The solar group is one trajectory of Energy and each planet is a point on this same trajectory

Or

- The solar group is on geometrical structure and each planet is a part of this same geometrical structure As I have explain in my previous paper

The Solar Group Is One Geometrical Structure

In this introduction we should discuss the geometrical meaning behind some data for example...Mars Axial tilt = 25.2 degrees...

We know that the value (25.2) is the constant in Kepler 3rd law using solar planets data where the distance is million km units and the periods are in days units

So $D^3 = 25.2 \times P^2$ (kepler 3rd law)

But $25.2 = 8\pi$

Why $25.2 = 8\pi$? Where we know that π is a cyclic number... why the constant in kepler 3rd law = 8π ?

Also Neptune axial tilt = 28.3 degrees but $(180 / 2\pi) = 28.6$ degrees where $28.6 \times 0.99 = 28.3$ degrees

The question simply why many values in the solar group is cyclic numbers?

In all my papers I provide one idea...

The current theory tells us each planet is separated and independent from other planets, based on that the planet data is his own data

I try to prove that, the solar group is one trajectory of Energy and each planet is a point ion this same trajectory which makes each planet data is suitable and complementary to other planets data, and this the reason caused the previous data creation.

Marx axial tilt (25.2) is the constant in kepler 3rd law equation basically because $(25.2 = 8\pi)$ which means Mars axial tilt is a cyclic number because this same value

works for many planets and should be in harmony with all of them, that's why Mars axial tilt should be a cyclic number...

Also Neptune axial tilt 28.3 degrees does a similar role because Neptune reflected the main energy toward the inner planets... that's why this planet should have a cyclic numbers to enable him to get harmony with many other planets

Please review

Solar Group Geometrical Structure

<http://vixra.org/abs/1805.0081>

I want to say that,

Because the solar planets are connected together (as one trajectory of Energy) that makes the cyclic numbers are necessary numbers to provide the harmony between these connected planets...

Pluto Data shows a strong relationship with Earth and supports this claim strongly.

In fact the main connection between Pluto and Earth is the distance 0.406 million km

0.406 million km =

= Earth Moon distance at apogee radius (I)

= Pluto Velocity Daily (II)

= $2088 \text{ mkm} \times (71)^2$ (III)

Equations I and II are clear let's discuss the third one

Equation (III)

2088 million km = Jupiter Uranus Distance, we have discussed this distance frequently... the light travel this distance is 6939.75 seconds but we know Metonic Cycle = 6939.75 days

If fact I claimed that the second value in light motion will be a day value in the moon motion

This process is done by Pluto contribution but this geometrical role isn't clear yet before me.... But in this paper I provide data proves the Earth Pluto Relationship and in next one we should discuss how the value 1 second can be 1 day...

The important value is $(71)^2 = 5041$ but we know that Mercury needs 5040 seconds to make his day 176 days

So Jupiter Uranus distance if contracted by Lorentz length contraction effect with rate 71 (which is produced by a velocity $v=0.9999c$) for 2 times. Means $(71)^2$ will produce this same distance 0.406 million km

Now Metonic Cycle and the moon orbit are found based on this same value 0.406 mkm and I claim that Pluto contributed by his relationship with the Earth to do this job. That means the moon orbit and Metonic Cycle are found by help of Pluto..

Any way the previous data can be explained only by my theory that the solar group is one geometrical structure. where the value $(71)^2$ (relativistic effect) is used frequently in the solar group geometrical structure but seen by us as 5040 seconds.

3- Earth Pluto Relationship

3-1 The orbital Period and Distance

I- Data

- 1- Pluto orbital period 90588 days = $8\pi^3 \times 365.25$ days (Earth orbital period)
- 2- Pluto orbital Circumference 37000 mkm = $8\pi^3 \times 149.6$ mkm Earth orbital (distance)
- 3- Earth Velocity daily 2.58 mkm = Pluto Velocity Daily 0.406 mkm x 2π

II- Discussion

The data is clear enough

- Pluto Orbital Period depends on Earth orbital period
- Pluto Orbital Distance depends on Earth orbital Distance
- Earth Daily Velocity depends on Pluto Daily Velocity

3-2-Orbital inclination and axial tilt

I- Data

- 17.4 deg.(inner planets orbital inclinations total) x 0.99 = 17.2 deg. Pluto orbital inclination
- 23.6 deg.(outer planets orbital inclinations total) x 0.99 = 23.4 deg. Earth axial tilt
- 122.5 deg. Pluto axial tilt = 17.2 deg. Pluto orbital inclination x 7.1 (lorentz length contraction rate for a velocity $v=0.99c$)

II- Discussion

I wish the data is clear before our eyes

There's a geometrical reason based on which both value of Pluto orbital inclination and Earth axial tilt are produced.... This is the only way to explain the previous data

If there's a geometrical reason effect on both planet (Pluto and Earth) that means there's a geometrical relationship between these 23 planets which disproves the gravity concept.

3-3 General Relationships

I- Data

- 232.7 deg. (inner planets axial tilts total) = 1461 days (earth 4 years cycle)/ 2π
- 232.7 deg. = 122.5 deg. Pluto axial tilt x 1.9 deg. Mars orbital inclination
- 232.7 deg.= 37000 mkm (Pluto orbital circumference) / $16 \pi^2$
- 37000mkm (Pluto orbital circumference)= 1461 days x 25.2 deg.

We should remember our rule 1 million km = 1 day = 1 degree...

Important Equation

- $179.7 \text{ deg.} \times 7 = 1259.3 \text{ deg.}$ but $1259 \text{ deg} \times 0.406 = 511.1$ (solar planets axial tilts total)

II- Discussion

I can't explain the geometrical rules which produced this data but I can confirm that this data is produced based on a geometrical reason which proves there's a geometrical relationship between Earth and Pluto disproving the gravity concept.
