Covid 19 marks 72 years after the Corona/Roswell-Ufo crash

Just a thought on the present Corona crisis. The famous Roswell ufo crash in 1947 happened to be in a little town named Corona. The crash was reported earlier in Corona than in Roswell (1). From 1947 to 2019 marks 72 years. And here we have got the religious dimension of it. In islam a tridition says that there are 72 virgins (demons?) in heaven. Another tradition states that 72 demons evoked king Sakomon (2). Can it be that the Gray Aliens had introduced the Corona Virus in an attempt to accelerate the process that will finally lead to the Endtimes?
